MANJARA CHARITABLE TRUST
RAJIV GANDHI INSTITUTE OF TECHNOLOGY

CESS stands for Computer Engineers Students Society. With over 400 undergraduate students in the department, CESS is one of the largest engineering departmental clubs. CESS provides a great platform for all its members to get into various extracurricular activities. We aim that students should have in depth knowledge about the upcoming technologies and to achieve that objective, we try to conduct workshops and seminars which is required for applications in the real world, which are not included in the curriculum. Through the hard work of our faculty and student volunteers, our goal is to provide the students with a better environment to learn and gain lifelong skills. The purpose of the Computer Engineering Student Society is to provide the students with an educational and professional community aimed at preparing students for a rigorous academic program, exploring educational and professional post-graduate options and making the most out of their Purdue experience. We encourage all our student members to get involved.

Some of the events conducted by CESS in the past are as follows:

- Workshop on Big Data and Hadoop
- Android app development and 3D game designing
- Seminar on IOT
- Seminar on Latex
- Workshop on Python
- And many more ...

Some of our upcoming events are as follows:

- Seminar on Networking
- Workshop on Digital Marketing
- Seminar on Adobe Technologies
- Industrial visit for the year 2016-17.
